AI Engineer with 5+ years of production backend experience across Fintech, EdTech, and Web3, specializing in LLM systems, RAG pipelines, and the infrastructure required to make intelligent applications scale. Expertise spans LLM orchestration, vector search, Databricks, MLflow, and cloud-native deployment. MSc Artificial Intelligence in progress at the University of Salford, focused on NLP, deep learning, and applied AI systems.

WORK EXPERIENCE

CHIEF TECHNOLOGY OFFICER

Flipeet Labs | 2022 – Present

- Designed and scaled a Web3 fintech ecosystem on containerized AWS infrastructure using Docker and GitHub Actions, achieving 99.9% uptime across mission-critical payment services
- Delivered Flipeet Pay, a stablecoin on/off-ramp platform with token bridging logic and utility payment systems, processing \$20k+ in transactions with real-time audit trails
- Spearheaded a crypto-fiat crowdfunding engine integrating 3 payment providers (Paystack, Flutterwave, Solana Pay) for USDC and SOL settlement across 2 fiat currencies
- Directed cross-chain NFT marketplace strategy across Solana and 3 EVM networks, deploying IPFS for decentralised storage and cutting CI/CD deployment times by 35%

SENIOR SOFTWARE ENGINEER (LEAD)

BlueTag Technologies Ltd | 2020 – Present

Senior Software Engineer (Lead)

2024 – Present · Remote

- Transformed enterprise .NET backend services for 20+ healthcare and education clients, overhauling MSSQL schemas to cut data retrieval latency by 31% and technical debt by 30%
- Championed engineering excellence through structured code reviews and mentoring, raising unit test coverage across a team of 5+ developers

Software Engineer II

2023 – 2024 · Hybrid

- Developed and integrated enterprise Web APIs with third-party Fintech and EdTech providers, modernizing legacy modules to ASP.NET Core for improved throughput

Software Engineer I

2020 – 2023 · On-site

- Produced a School Management Portal from scratch using ASP.NET MVC, shipping a production-ready MVP within 6 months and scaling to 5,000+ active students

SENIOR BACKEND ENGINEER

Eastside Ventures · Part-time | 2023 – 2025 · Remote

- Deployed a distributed multi-product ecosystem across 6+ Media and Fintech platforms, scaling to 100k+ users at 99.9% uptime using NestJS and Node.js
- Programmed an autonomous Python trading bot with real-time execution logic across Binance, Bybit, and Coinbase APIs, processing millions of market data points daily
- Secured crypto payment rails for BTC, USDC, and Solana, handling 50M+ NGN in transactions with real-time fraud detection and automated audit trails
- Consolidated 10+ third-party integrations (KYC, Payments, Social Graph) into a modular API Gateway, cutting delivery latency by 40% across all platforms
