PROFESSIONAL SUMMARY

Senior backend engineer with 5+ years of production experience designing and scaling high-concurrency distributed systems in C# and .NET across fintech, EdTech, and Web3. Currently pursuing an MSc in AI at the University of Salford, with applied experience in LLM-backed systems and RAG pipelines.

EDUCATION

University of Salford

MSc Artificial Intelligence.

Manchester, UK

2026 – 2027 (In Progress)

Enugu State University of Science and Technology

BSc Computer Science. Second Class Upper (2:1).

Enugu, Nigeria

2016 – 2020

EXPERIENCE

Co-Founder & CTO

Mar 2023 – Present

Flipeet Labs

Remote

- Architected a Web3 fintech ecosystem on containerized AWS infrastructure, achieving 99.9% uptime across payment services.
- Engineered Flipeet Pay, processing \$50k+ across on-ramp, off-ramp, token bridging, and stablecoin payments on Solana, BSC, Base, and Polygon.
- Automated CI/CD pipelines with GitHub Actions, reducing deployment lead times by 35%.

Senior Software Engineer (Lead)

Apr 2024 – Present

BlueTag Technologies Ltd

Remote

- Architected mission-critical backend services using ASP.NET Core across 20+ clinics and educational institutions.
- Maintained an EdTech LMS serving 4.85M+ students across 10+ colleges.
- Engineered scalable MSSQL schemas with advanced indexing, reducing data retrieval latency by 31%.
- Implemented HMAC-based signature verification for third-party payment webhook integrations.

Software Engineer II

Apr 2023 – Mar 2024

BlueTag Technologies Ltd

Hybrid

- Built enterprise Web APIs with resilient integrations for third-party fintech and EdTech services.

Software Engineer I / Mentee

May 2019 – Apr 2023

BlueTag Technologies Ltd

On-site

- Refactored legacy C# codebases across flagship enterprise applications, improving maintainability and scalability.
- Built a School Management Portal from scratch, delivering a production-ready MVP within 6 months, serving 5,000+ students.

Senior Backend Engineer (Part-time)

Aug 2023 – Nov 2025

Eastside Ventures

Remote

- Architected a distributed ecosystem across 6+ platforms using NestJS, PostgreSQL, MongoDB, RabbitMQ, and Redis, supporting 50k+ users at 99.9% uptime.
- Developed crypto payment rails processing 50M+ NGN in transactions with real-time fraud detection.

PROJECTS

Flipeet Pay Infrastructure

- Built a dual-rail stablecoin platform with a consumer on/off-ramp to Nigerian banks and a white-label merchant payment API on a shared backend, using NestJS, PostgreSQL, Docker, and AWS.
- Implemented a multi-provider ramp abstraction, a live MongoDB-to-PostgreSQL migration, and a Stellar USDC self-custody system with per-user on-chain wallets on Solana, BSC, Base, and Polygon.

Syncboard Solutions

- Built a laboratory management platform (C#, ASP.NET Core) handling payment collection, specimen tracking, and automated result computation.

Enterprise Membership System

- Developed a security-first institutional management portal (ASP.NET Core, C#, MSSQL) featuring forensic data verification and automated compliance reporting for large-scale member databases.

School Portal

- Delivered a comprehensive school management platform (ASP.NET MVC, C#, MSSQL) covering admissions, fee payments, LMS, academic result processing, and SMS notifications.

CERTIFICATIONS

- MongoDB University: GenAI Developer track, vector search, RAG applications, and AI agents

- Microsoft Learn: AZ-204 Learning Path; Azure DevOps & Infrastructure Automation
- AWS Training & Certification: AI/ML Fundamentals and Use Cases
- Udemy: The AI Engineer Course 2025 (Complete Bootcamp)

AWARDS & HONORS

- Best Outstanding Mentee, BlueTag Technologies Ltd (2020)
- Africacomcade Gamathon Winner, Africa Comicade (2020)

SKILLS

Backend & Distributed Systems: C# (.NET Core / ASP.NET Core), Node.js (NestJS, TypeScript), Python (FastAPI), Microservices, Event-Driven Architecture, RabbitMQ, Redis

Databases: PostgreSQL, MongoDB, MSSQL, ChromaDB / Pinecone

Cloud & DevOps: AWS, Docker, CI/CD (GitHub Actions), Terraform, NGINX

AI / ML Engineering: LangChain / LlamaIndex, RAG Architectures, LLM APIs (OpenAI, Anthropic), Embeddings & Semantic Search

Blockchain / Web3: Solidity (EVM), Solana, Stellar, Smart Contract Security
