PROFESSIONAL SUMMARY

Backend engineer with 5+ years of production experience building high-concurrency distributed systems across fintech, EdTech, and Web3, with a specialization in AI/ML infrastructure. Deep expertise in ASP.NET Core, NestJS, event-driven architecture, and microservices, paired with hands-on experience building RAG pipelines and LLM-backed systems. Currently pursuing an MSc in AI at the University of Salford. Startup co-founder and team lead promoted through four stages of a five-year engineering career.

EDUCATION

University of Salford <i>MSc Artificial Intelligence.</i>	Manchester, UK 2026 – 2027 (<i>In Progress</i>)
Enugu State University of Science and Technology <i>BSc Computer Science. Second Class Upper (2:1).</i>	Enugu, Nigeria 2016 – 2020

EXPERIENCE

Co-Founder & CTO <i>Flipeet Labs</i>	Mar 2023 – Present <i>Remote</i>
- Architected a Web3 fintech ecosystem from scratch on containerized AWS infrastructure, achieving 99.9% uptime across payment services. - Engineered Flipeet Pay, processing \$50k+ across on-ramp, off-ramp, token bridging, and stablecoin bill payments on Solana, BSC, Base, and Polygon. - Automated CI/CD pipelines with GitHub Actions, reducing deployment lead times by 35%.	
Senior Backend Engineer (Part-time) <i>Eastside Ventures</i>	Aug 2023 – Nov 2025 <i>Remote</i>
- Architected a distributed ecosystem spanning 6+ platforms using NestJS, PostgreSQL, MongoDB, RabbitMQ, and Redis, supporting 50k+ users at 99.9% uptime. - Developed crypto payment rails processing 50M+ NGN in transactions with real-time fraud detection.	
Senior Software Engineer (Lead) <i>BlueTag Technologies Ltd</i>	Apr 2024 – Present <i>Remote</i>
- Architected mission-critical backend services using ASP.NET Core across 20+ clinics and educational institutions. - Maintained an EdTech LMS serving 200,000+ students across 10+ colleges. - Engineered scalable MSSQL schemas with advanced indexing, reducing data retrieval latency by 31%.	
Software Engineer II <i>BlueTag Technologies Ltd</i>	Apr 2023 – Mar 2024 <i>Hybrid</i>
Developed enterprise Web APIs with resilient integrations for third-party Fintech and EdTech services.	
Software Engineer I <i>BlueTag Technologies Ltd</i>	Jun 2021 – Apr 2023 <i>On-site</i>
Refactored legacy C# codebases across flagship enterprise applications, improving maintainability and scalability.	
Software Engineer Mentee (Internship) <i>BlueTag Technologies Ltd</i>	May 2019 – May 2021 <i>On-site</i>
Built a School Management Portal from scratch, delivering a production-ready MVP within 6 months, serving 5,000+ students.	

PROJECTS

Syncbord Solutions	2025
Built a laboratory management platform (C#, ASP.NET Core) handling payment collection, specimen tracking, and automated test result computation.	

CERTIFICATIONS

- MongoDB University: GenAI Developer track, vector search, RAG applications, and AI agents
- Microsoft Learn: AZ-204 Learning Path; Azure DevOps & Infrastructure Automation
- AWS Training & Certification: AI/ML Fundamentals and Use Cases
- Udemy: The AI Engineer Course 2025 (Complete Bootcamp)

AWARDS & HONORS

- Best Outstanding Mentee, BlueTag Technologies Ltd (2020)
- Africacomcade Gamathon Winner, Africa Comicade (2020)

SKILLS

Backend & Distributed Systems: C# (.NET Core / ASP.NET Core), Node.js (NestJS, TypeScript), Python (FastAPI), Microservices, Event-Driven Architecture, RabbitMQ, Redis

AI / ML Engineering: LangChain / LlamaIndex, RAG Architectures, LLM APIs (OpenAI, Anthropic, OpenRouter), Embeddings & Semantic Search, Hugging Face Transformers, MLOps (MLflow, Databricks)

Databases: PostgreSQL, MongoDB (incl. Atlas Vector Search), MSSQL, ChromaDB / Pinecone

Cloud & DevOps: AWS, Docker, CI/CD (GitHub Actions), Terraform, NGINX

Blockchain / Web3: Solidity (EVM), Solana, Smart Contract Security, IPFS
